<b>Wednesday 8</b>	Ja	nua	ry 2020
Morning (Time: 1 hour 30 minute	s)	Paper R	eference WMA11/01
Mathematics			
International Advanced Pure Mathematics P1	d Suk	osidiar	y/Advanced Level
You must have: Mathematical Formulae and Stat	istical	ables (Lil	ac), calculator

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

## **Instructions**

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer all questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
   there may be more space than you need.
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

## Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 11 questions in this question paper. The total mark for this paper is 75.
- The marks for each question are shown in brackets
  - use this as a guide as to how much time to spend on each question.

## **Advice**

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

  Turn over

1. Find, in simplest form,	$\int \left(\frac{8x^3}{3} - \frac{1}{2\sqrt{x}} - 5\right) \mathrm{d}x$	(4)

3.

Figure 1

Figure 1 shows part of the curve with equation  $y = x^2 + 3x - 2$ 

The point P(3,16) lies on the curve.

(a) Find the gradient of the tangent to the curve at P.

**(2)** 

The point Q with x coordinate 3 + h also lies on the curve.

(b) Find, in terms of h, the gradient of the line PQ. Write your answer in simplest form. (3)

(c) Explain briefly the relationship between the answer to (b) and the answer to (a). (1)

4.

Figure 2

Figure 2 shows the plan view of a house ABCD and a lawn APCDA.

ABCD is a rectangle with  $AB = 16 \,\mathrm{m}$ .

APCOA is a sector of a circle centre O with radius 12 m.

The point O lies on the line DC, as shown in Figure 2.

(a) Show that the size of angle *AOD* is 1.231 radians to 3 decimal places.

**(2)** 

The lawn APCDA is shown shaded in Figure 2.

(b) Find the area of the lawn, in m<sup>2</sup>, to one decimal place.

**(4)** 

(c) Find the perimeter of the lawn, in metres, to one decimal place. (3)

**7.** 

Figure 3

Figure 3 shows part of the curve  $C_1$  with equation  $y = 3\sin x$ , where x is measured in degrees.

The point P and the point Q lie on  $C_1$  and are shown in Figure 3.

- (a) State
  - (i) the coordinates of P,
  - (ii) the coordinates of Q.

(3)

A different curve  $C_2$  has equation  $y = 3\sin x + k$ , where k is a constant.

The curve  $C_2$  has a maximum y value of 10

The point R is the minimum point on  $C_2$  with the smallest positive x coordinate.

(b) State the coordinates of R.

**10.** The curve  $C_1$  has equation y = f(x), where

$$f(x) = (4x - 3)(x - 5)^2$$

(a) Sketch  $C_1$  showing the coordinates of any point where the curve touches or crosses the coordinate axes.

**(3)** 

- (b) Hence or otherwise
  - (i) find the values of x for which  $f\left(\frac{1}{4}x\right) = 0$
  - (ii) find the value of the constant p such that the curve with equation y = f(x) + p passes through the origin.

**(2)** 

A second curve  $C_2$  has equation y = g(x), where g(x) = f(x + 1)

- (c) (i) Find, in simplest form, g(x). You may leave your answer in a factorised form.
  - (ii) Hence, or otherwise, find the y intercept of curve  $C_2$

**(3)**
