Morning (Time: 2 hours 30 minut	tes)	Paper Ref	erence V	/MA01/01	
Core Mathemat	tics	C12			
Advanced Subsidiary					

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B). Coloured pencils and highlighter pens must not be used.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
 there may be more space than you need.
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- When a calculator is used, the answer should be given to an appropriate degree of accuracy.

Information

- The total mark for this paper is 125.
- The marks for each question are shown in brackets
 use this as a quide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

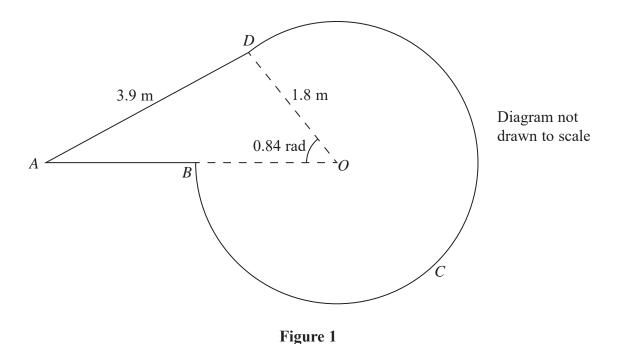

Figure 1 shows the design for a shop sign ABCDA.

The sign consists of a triangle *AOD* joined to a sector of a circle *DOBCD* with radius 1.8 m and centre *O*.

The points A, B and O lie on a straight line.

Given that AD = 3.9 m and angle BOD is 0.84 radians,

- (a) calculate the size of angle DAO, giving your answer in radians to 3 decimal places.
- (2)

(b) Show that, to one decimal place, the length of AO is 4.9 m.

- **(3)**
- (c) Find, in m^2 , the area of the shop sign, giving your answer to one decimal place.
- **(3)**
- (d) Find, in m, the perimeter of the shop sign, giving your answer to one decimal place.

12. Karen is going to raise money for a charity.	
She aims to cycle a total distance of 1000 km over a number of days.	
On day one she cycles 25 km.	
She increases the distance that she cycles each day by 10% of the distance cycled on the previous day, until she reaches the total distance of 1000 km.	
She reaches the total distance of $1000 \mathrm{km}$ on day N , where N is a positive integer.	
(a) Find the value of <i>N</i> .	(4)
On day one, 50 people donated money to the charity. Each day, 20 more people donated to the charity than did so on the previous day, so that 70 people donated money on day two, 90 people donated money on day three, and so on.	
(b) Find the number of people who donated to the charity on day fifteen.	(2)
Each day, the donation given by each person was £5	
(c) Find the total amount of money donated by the end of day fifteen.	(3)

13. $f(x) = 3x^3 + 3x^2 + cx + 12$, where c is a constant

Leave blank

Given that (x + 3) is a factor of f(x),

(a) show that c = -14

(2)

(b) Write f(x) in the form

$$f(x) = (x+3)Q(x)$$

where Q(x) is a quadratic function.

(2)

(c) Use the answer to part (b) to prove that the equation f(x) = 0 has only one real solution.

(2)

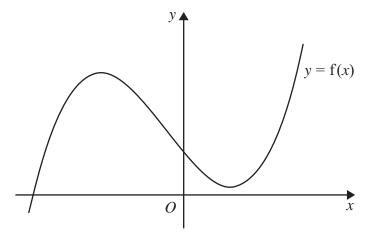

Figure 2

Figure 2 shows a sketch of the curve with equation $y = f(x), x \in \mathbb{R}$.

On separate diagrams sketch the curve with equation

(d) (i)
$$y = f(3x)$$

(ii)
$$y = -f(x)$$

On each diagram show clearly the coordinates of the points where the curve crosses the coordinate axes.

14. In this question solutions based entirely on graphical or numerical methods are not acceptable.

(i) Solve, for $-180^{\circ} \le x < 180^{\circ}$, the equation

$$\sin(x+60^{\circ}) = -0.4$$

giving your answers, in degrees, to one decimal place.

(4)

(ii) (a) Show that the equation

$$2\sin\theta\tan\theta - 3 = \cos\theta$$

can be written in the form

$$3\cos^2\theta + 3\cos\theta - 2 = 0$$

(3)

(b) Hence solve, for $0 \le \theta < 360^{\circ}$, the equation

$$2\sin\theta\tan\theta - 3 = \cos\theta$$

showing each stage of your working and giving your answers, in degrees, to one decimal place.

16.

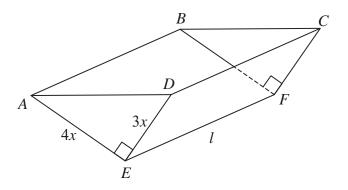

Figure 4

Figure 4 shows the design for a container in the shape of a hollow triangular prism.

The container is open at the top, which is labelled ABCD.

The sides of the container, ABFE and DCFE, are rectangles.

The ends of the container, *ADE* and *BCF*, are congruent right-angled triangles, as shown in Figure 4.

The ends of the container are vertical and the edge *EF* is horizontal.

The edges AE, DE and EF have lengths 4x metres, 3x metres and l metres respectively.

Given that the container has a capacity of 0.75 m³ and is made of material of negligible thickness,

(a) show that the internal surface area of the container, Sm^2 , is given by

$$S = 12x^2 + \frac{7}{8x}$$
 (5)

(b) Use calculus to find the value of x, for which S is a minimum. Give your answer to 3 significant figures.

(5)

(c) Justify that the value of x found in part (b) gives a minimum value for S.

(2)

Using the value of x found in part (b), find to 2 decimal places,

- (d) (i) the length of the edge AD,
 - (ii) the length of the edge *CD*.
